HFB's guide to Winter wellness products for your store

MANUKA HEALTH MGO™ 400+ MANUKA HONEY SYRUP

Manuka Health MGO™ 400+ Manuka Honey Syrup is an all-natural formula designed to help target winter ills and chills. It is certified to contain at least 400mg/kg of dietary methylglyoxal or MG, a natural compound responsible for the remarkable properties in Manuka Honey. Dietary methylglyoxal is found in significant quantities in only some manuka honey produced from the wild, uncultivated manuka plant in New Zealand. The MGO scale measures actual levels of the compound Methylglyoxal, whereas UMF is an approximation, so make sure you look for the MGO™ symbol on Manuka Honey products during the season changes.
